

# F-SERIES

FORM, FILL AND SEAL MACHINES FOR SACHETS

IMA HASSIA has been the technological leader in the field of VFFS sachet machines for many years. Our development initiatives always aim to achieve individual technical solutions in close collaboration with our customers. And in production environments, they distinguish themselves by their high reliability, efficiency and economy.

# SACHETS – VERSATILE AND PRACTICAL

With the **F-series** for sachets, IMA HASSIA offers a modular machine series which can be matched to the requirements of both - the market and the product.

The **F-series** produces 4-sided-sealed sachets for consumer, cosmetics and pharmaceutical products.

**F600 / F800 SIMPLEX**

## Flexible

- Customer- and product-specific design
- Adjusted to the product and production requirements
- Many different sachet designs are possible
- Size configuration according to the requested production capacity
- Flexible control concepts
- Integration with customer-specific systems
- All materials suitable for heat-sealing can be processed

## Hygiene class

- Clean
- Ultra-clean as option

With a long experience in the production of sachet packaging machines combined with dosing systems with high filling accuracies, IMA HASSIA guarantees appropriate sachet solutions for easy-to-use pre-portioned products.

## Effective

- Guaranteed output performance
- Total service performance
- High operating comfort
- Remote diagnostic and tele-service via internet link
- HMI (Human Machine Interface)
- Operational data collection
- Automatic station positioning
- Dosing units with optimum filling accuracy
- Hygienic configurations
- CIP and SIP suitable dosing units

**F600 DUPLEX**

Filler for liquid and pasty products

Sachet sealing

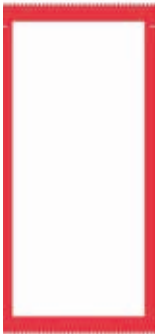

### Advantages:

- Careful product handling with focus on quality assurance
- Dosing units adjusted to the product requirements
- High filling accuracy
- Optimum hygiene standards ensured
- Hermetic pack seal – easy to open
- Excellent convenience

### TECHNICAL DETAILS

MACHINE TYPE	MAX.		TYPICAL OUTPUT RANGE
	Material width [mm]	Draw-off length [mm]	
F600 SIMPLEX	1.200	200	7.200 - 76.800 sachets/hour.
F600 DUPLEX	2 x 600	200	7.200 - 76.800 sachets/hour.
F800 SIMPLEX	1.200	200	9.600 - 96.000 sachets/hour.

### Examples for sealing possibilities (4-sided seal):

Standard contour

Bottle Neck contour
