## HERAEUS BLUELIGHT® **PREMIUM**

### **NEXT GENERATION TO HERAEUS NG-SYSTEMS**

SUITABLE FOR HASSIA THERMOFORMING MACHINES  
TYPE SERIES: THL | THM | TAS | C-SERIES | P-SERIES

***HERAEUS NG-Systems for surface disinfection  
have been discontinued.***

***We are now able to offer you the new  
BlueLight® Premium UV system to solve your  
disinfection challenges!***

#### **Application area**

- **BlueLight® Premium UV** system is especially designed for food packaging (lid web, bottom web, cups) disinfection for dry or liquid fresh products such as yogurt or milk.
- Replacement for all NG-System devices currently in use.
- Spare parts for the old NG-Systems are available until the end of February 2024.

#### **Your benefits**

- The lifetime of **BlueLight® Premium UV** is three times longer than of the existing equipment (12.000 h).
- Three times higher radiation intensity in comparison to the old generation systems.
- Can be used in moist environments due to protection class IP67.
- Accelerated production process as the maximum warm-up time of the lamps is 90 seconds.
- Optimised version of the breakage detector.
- The older generation NG-Systems will be replaced by trained IMA staff.
- Automatic dimming of the lamps during machine stops.
- Separate signal evaluation for each radiator (performance measurements).

#### **Delivery time and price indication**

- Approx. 20% higher initial costs; depending on the format.
- Delivery time approx. 3 months.
